

Big Idea

- ▶ Misinformation research surged after 2016
- ▶ Rooted in earlier psychology work
- ▶ Links memory studies to social media

Research Questions

- ▶ How did the term evolve?
- ▶ What traditions shaped it?
- ▶ What is missing today?

Data & Methods

- ▶ Papers (2011–2023)
- ▶ Keyword analysis
- ▶ Citation networks

Key Results

Explosion After 2016

- ▶ Rapid growth of publications

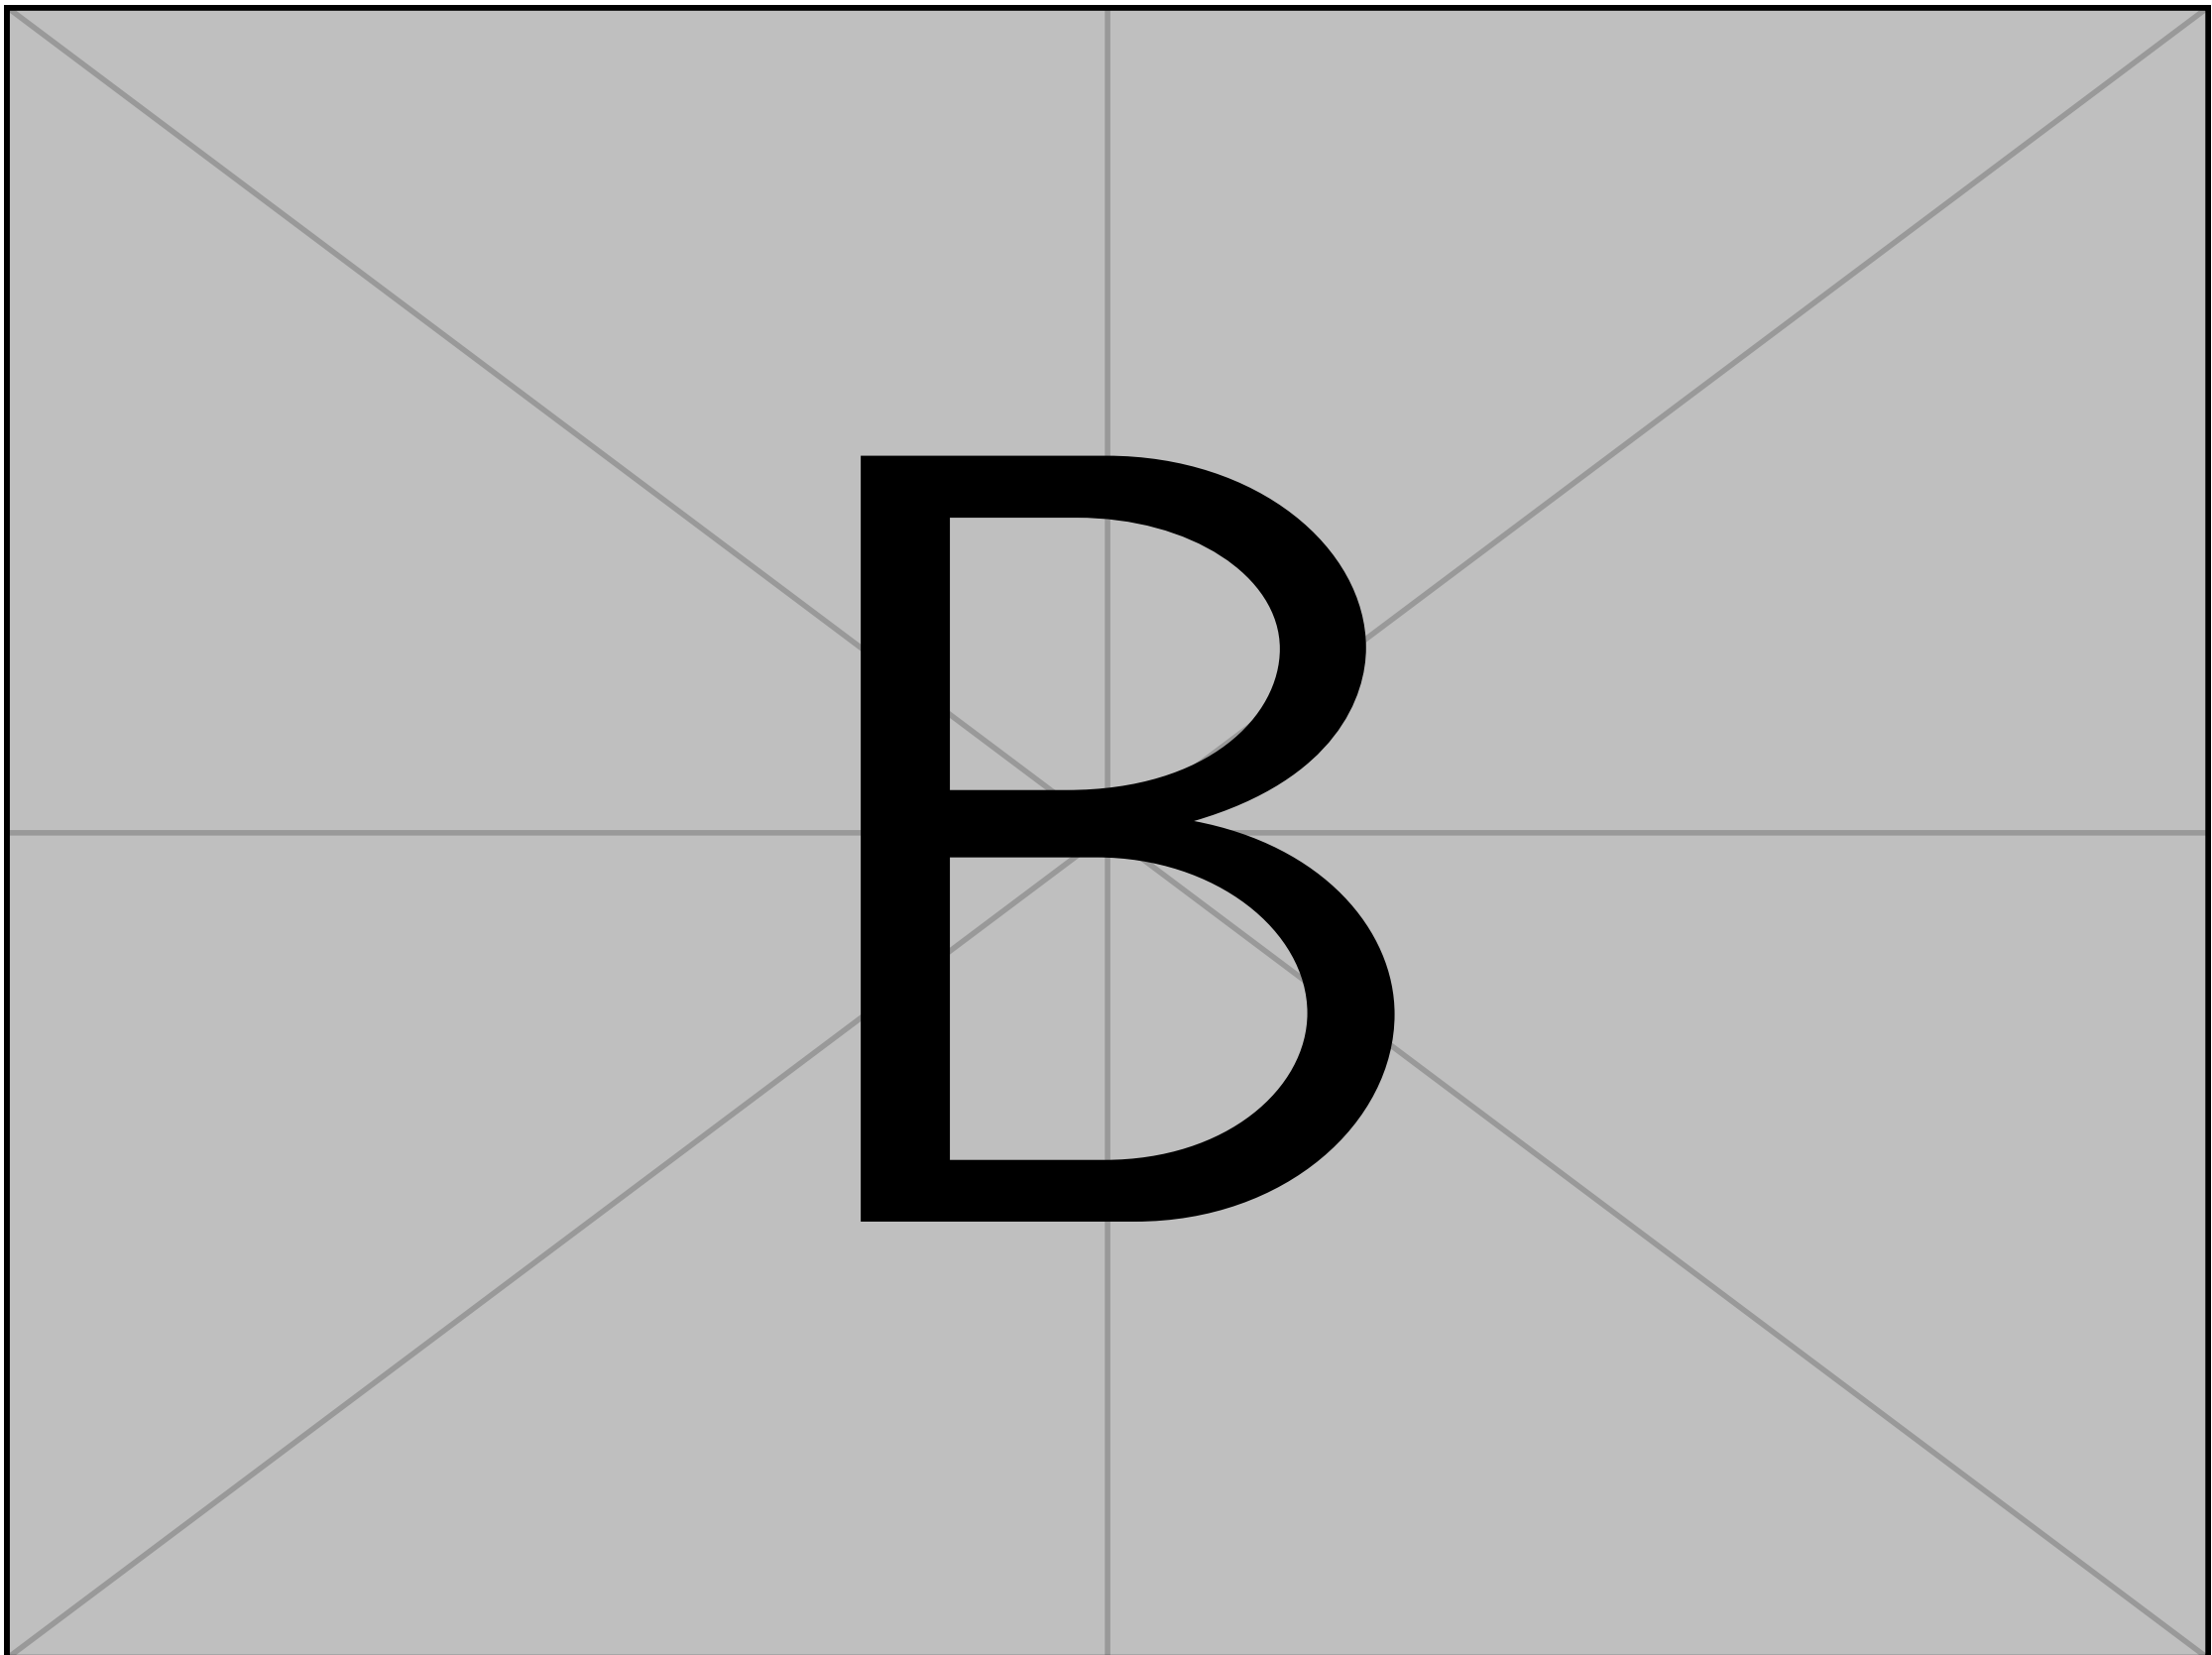

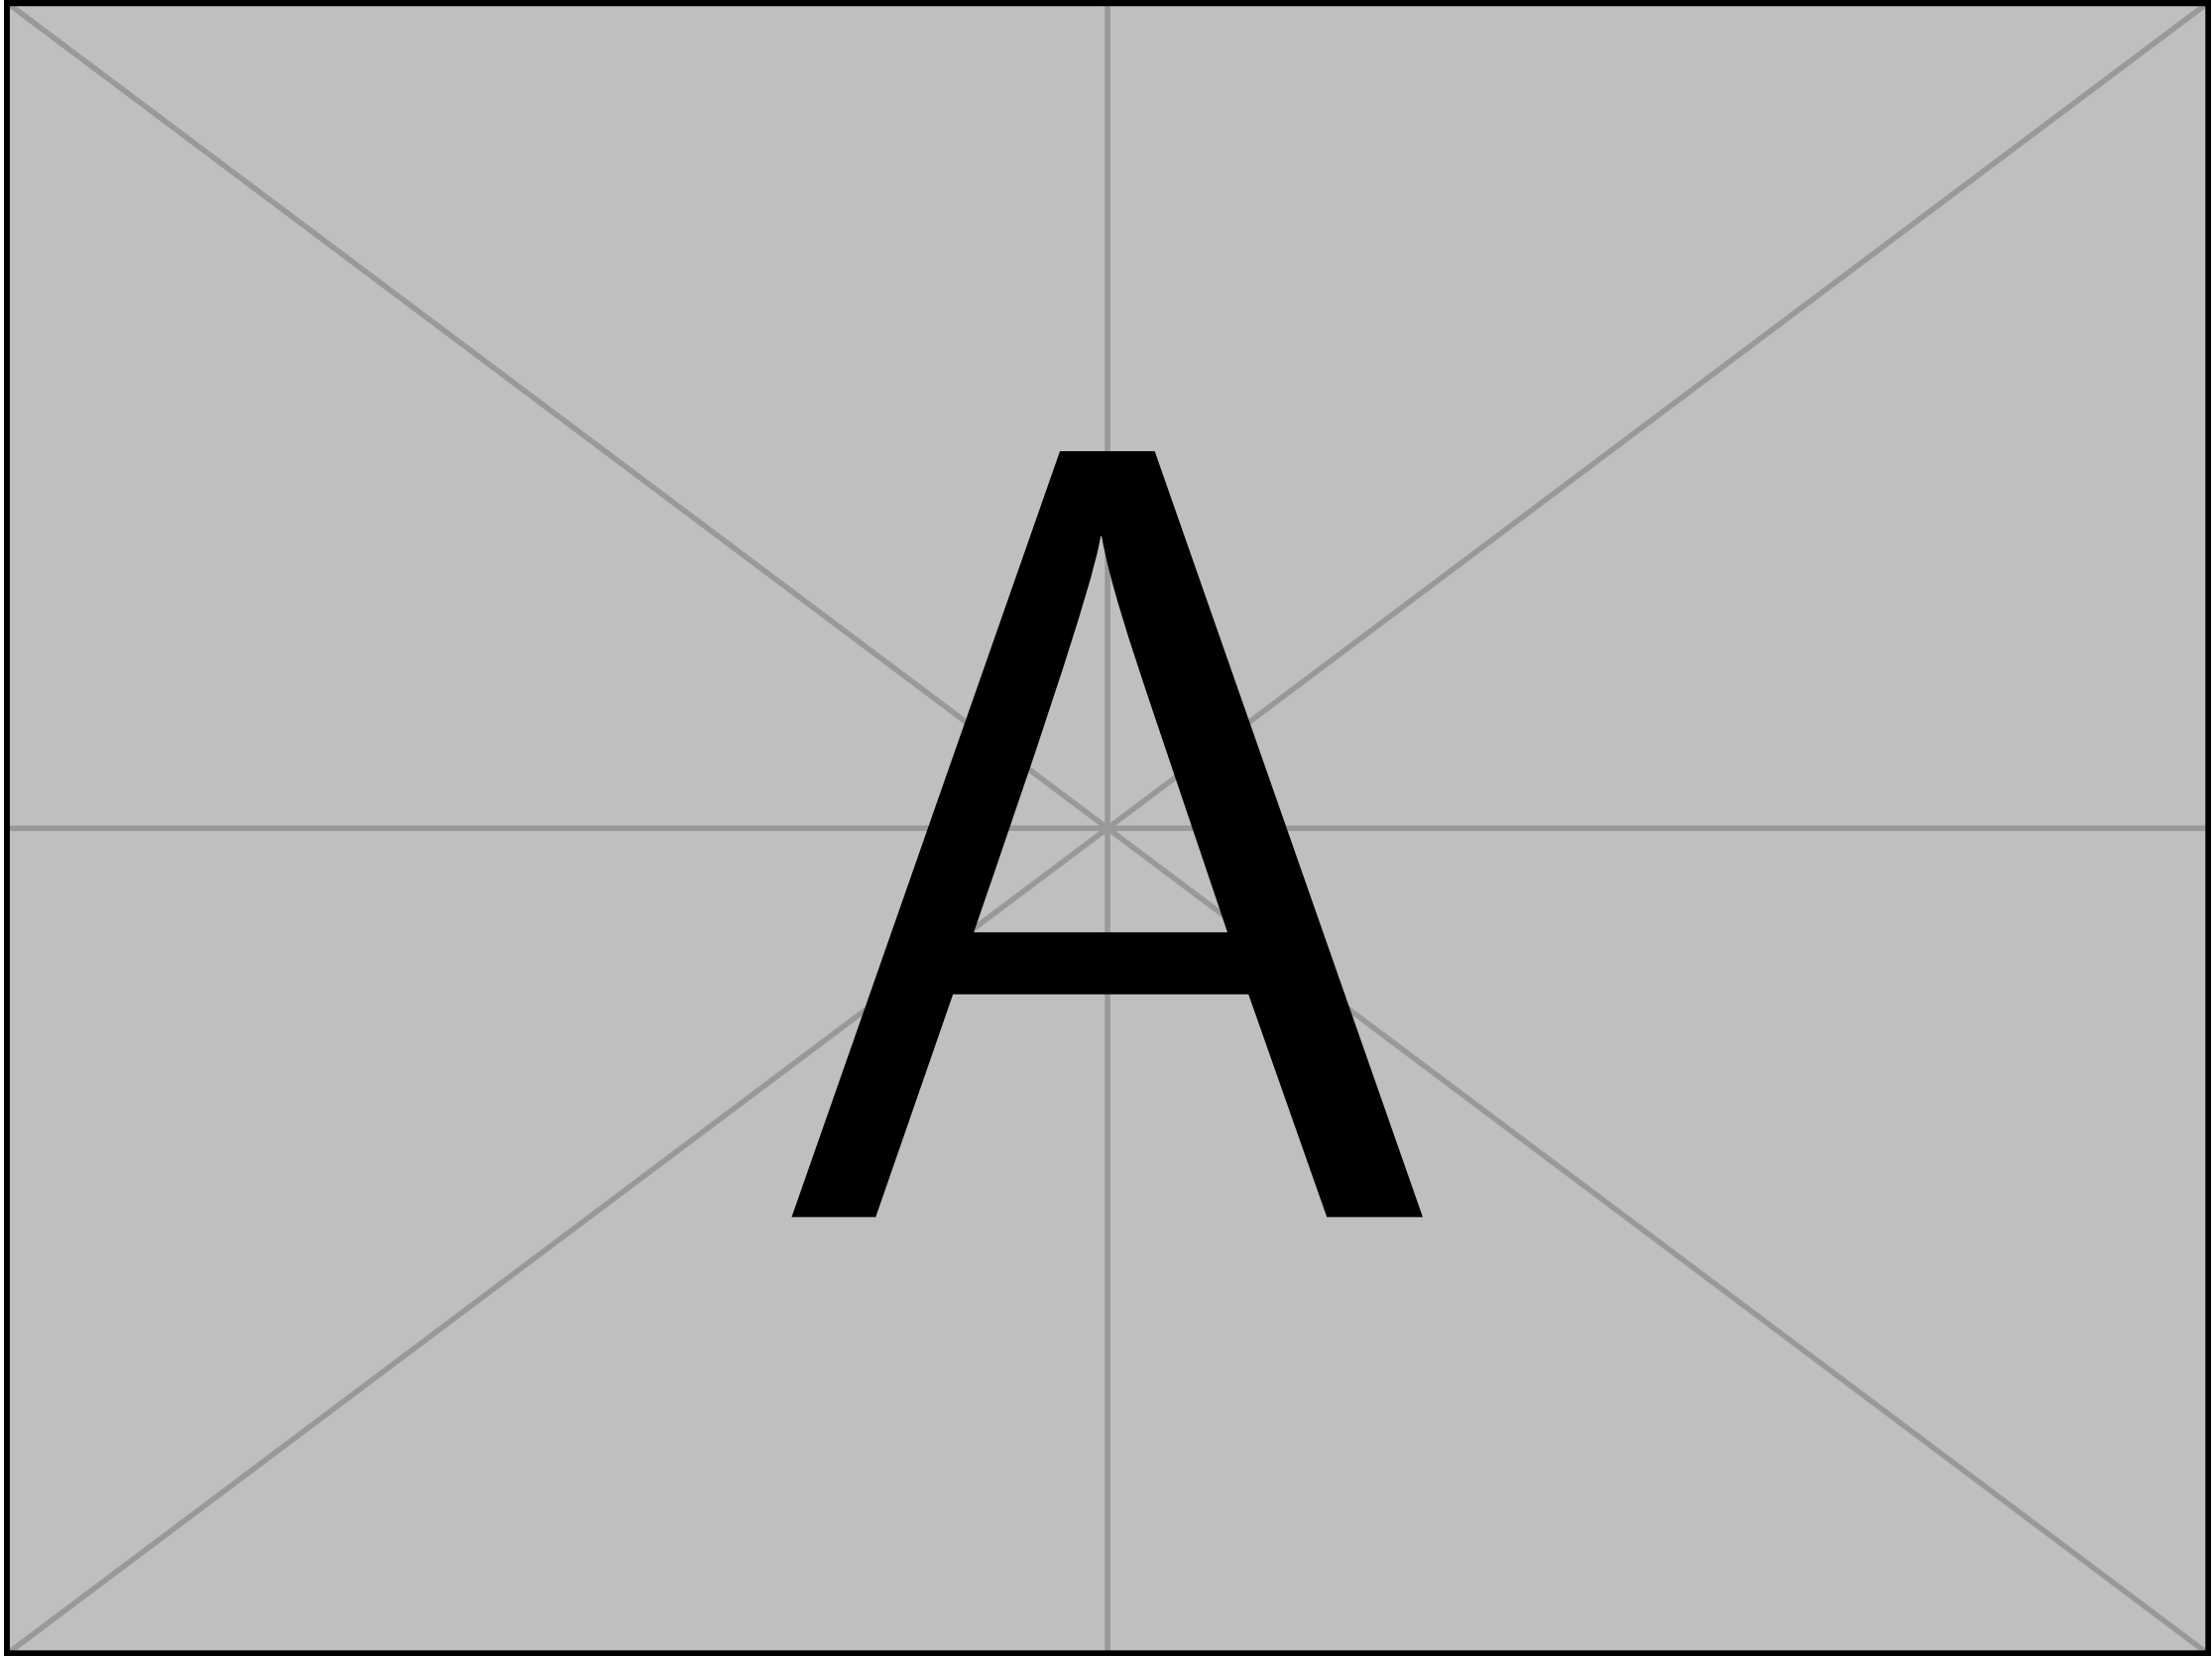

Two Paradigms

- ▶ Modern: social media spread
- ▶ Older: cognition and memory

Key Insight

- ▶ These traditions are not fully integrated

Figures

Concept

- ▶ A “misinformation paradigm”
- ▶ Combines cognition + networks

Implications

- ▶ Bridge disciplines
- ▶ Rethink assumptions

Conclusion

- ▶ Field is newer than it seems
- ▶ Built on older psychology research

Takeaway

Misinformation research blends psychology and social systems
